

Civic Data Cooperative Visual Brand Guidelines

2021

Introduction

This document will provide guidance on how to use the Civic Data Cooperative (CDC) brand. It will cover logo usage, typography, colour and graphics along with clear examples for the brand.

Please use this document when producing CDC branded communications for social media, websites, print materials etc. Where we have outlined guidance for certain things there will always be elements we cannot cover, best practice is to use common sense and consult a member of the team and partnership organisations for branding work which is outside of these guidelines.

Using the CDC Logo

1. Ensure that original vector artwork is used to ensure maximum quality.
2. Use the logo in a prominent and clear position.
3. Aim to use the primary logo where space will allow. Scale up as needed, depending on application but keep to minimum size.

Do not:

Stretch or distort or change the scale of elements in the logo

Rotate or site at angles

Recolour using non brand colours

Create confusing backgrounds

Request the correct vector artwork

Always use the correct file which can be requested (see contact details section).

For print, please use the CMYK version as this is preferred.

For digital the RGB version preferred.

Where possible use the .EPS file format for branded communications however as some software applications don't always accept .EPS we have provided high resolution .PNGs & JPGs.

Civic Data Cooperative Logo

Primary Logo

This logo is the CDC primary logo mark. It includes the CDC icon and wordmark. Where possible please use this logo for all branded and third party communications.

Please see next pages for spacing and guidance on colour variations.

Civic Data Cooperative Logo

Secondary Logo Mark

Where space won't allow or after the initial first impression of the Primary logo the 'Logo Mark' can be utilised.

By dropping the Word Mark you can save space and still remain clearly branded as CDC.

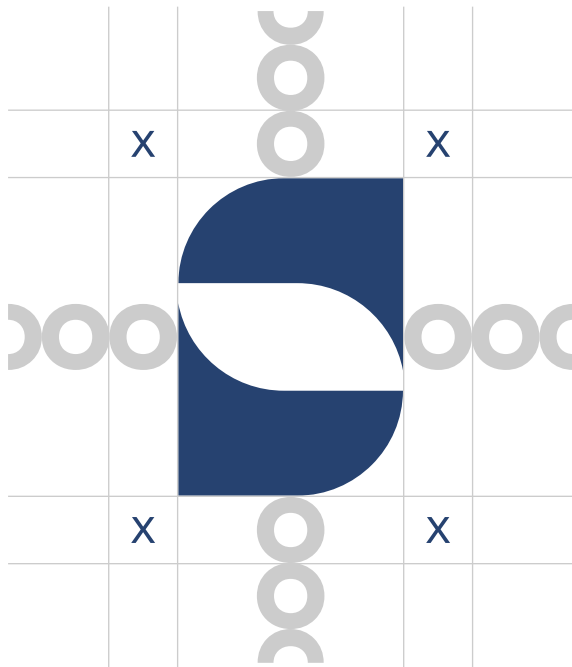

Civic Data Cooperative Logo

Spacing

We have created an exclusion zone around the CDC logo to make sure there is enough space for it to remain legible and not feel cramped.

Whilst we appreciate this is more of a professional method if you can't guarantee the spacing as shown on the right, please ensure there is enough space to feel comfortable.

Exclusion Zone

To the right we have shown by taking the 'O' from 'Civic Data Coop' we can create 'X' from here we should have 1 and half more to create the necessary space around the logo.

Minimum size

Please do not exceed using the logo under 20mm wide (55px)

20mm
(55px)

9mm
(23px)

The same spacing principles apply when using the secondary logo mark.

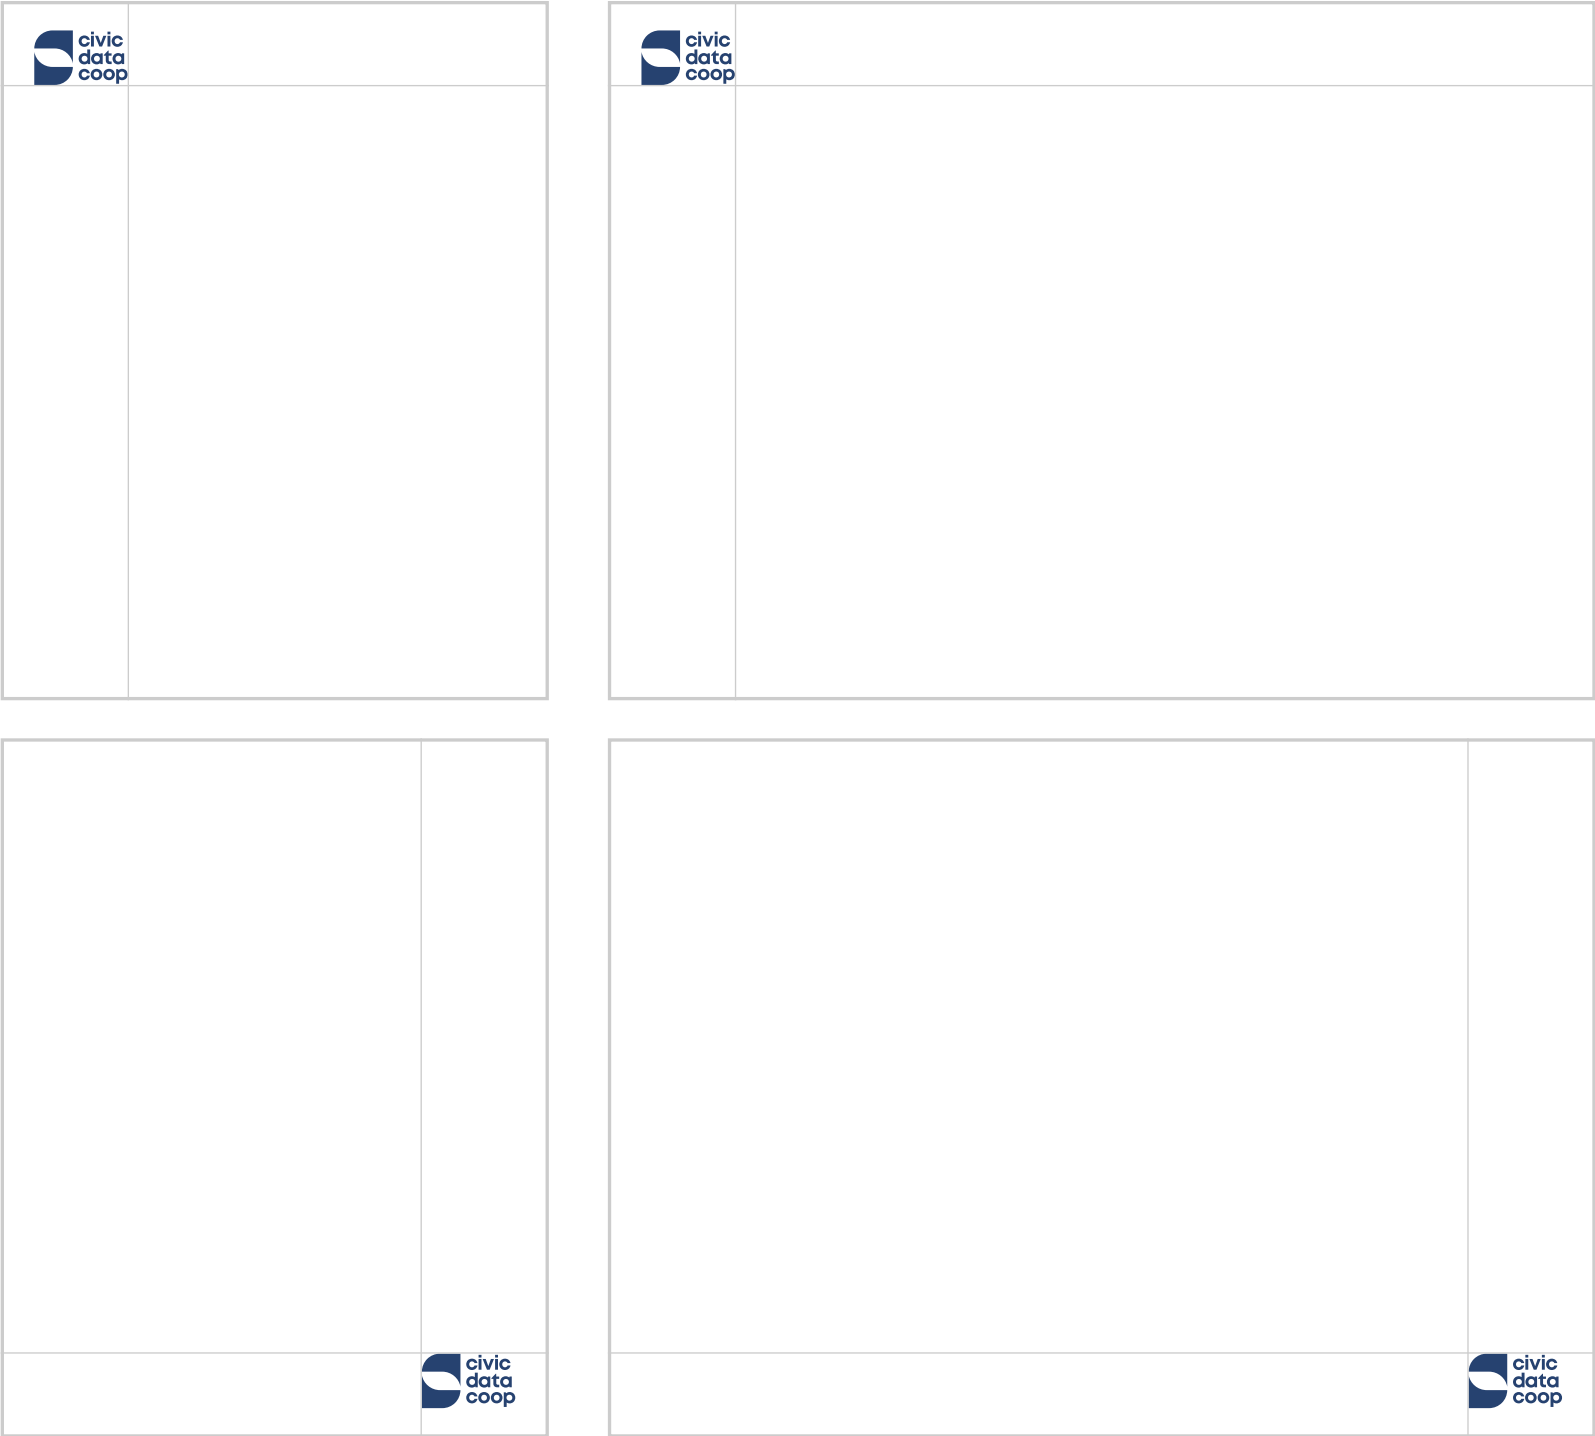

Civic Data Cooperative Logo

Placement

Using the exclusion zone principles try to place the CDC logo in a clear and prominent position. priority should be given to the top left, however bottom right is also allowed if layout requirements call for it.

Acceptable placements are shown in the diagrams.

The same guidelines apply to the use of the Logo Mark.

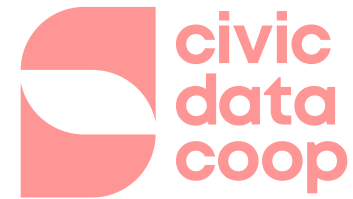

Civic Data Cooperative Logo

Primary Blue or White

Colour Variations

The CDC logo is flexible depending on where it is being used. Priority should be given to the CDC Blue or White logos but you can use full colour variations.

Secondary Teal, Yellow or Blush

CDC Logo with partners

For many communications, we will need to show our partners. Primarily these will be the University of Liverpool and Liverpool City Region Combined Authority along with the Metro Mayor.

Shown is how to layout these logos in order to allow enough spacing in between each organisation to maintain clarity.

Where full colour creates confusing or illegible depictions of the logos a solid black or white version can be used.

Colour palette

Ratio

The CDC palette is made up of five colours including white. The Hex, RGB and CMYK values are shown here.

When producing CDC branded communications try to stick to the ratio of colour as shown. The primary colour is the CDC blue, followed by blush and using the yellow and teal as highlight colours. If needed the support colours can be used as main colours in designs to create variety.

RGB & CMYK

Please use the Hex and RGB values for digital work and the CMYK values for Print based artwork.

#274271 R: 39 G: 66 B: 113 C:94 M:75 Y:28 K:15	#FF9797 R: 255 G: 151 B: 151 C:0 M:52 Y:30 K:0	#FFCA66 R: 255 G: 202 B: 102 C:0 M:23 Y:67 K:0
		#04B2BF R: 4 G: 178 B: 191 C:73 M:0 Y:27 K:0
		#FFFFFF R: 255 G: 255 B: 255 C:0 M:0 Y:0 K:0

Typography

Titles

Mont Bold
abcdefghijklmnopqrstuvwxyz

Body Copy

Mont Regular
abcdefghijklmnopqrstuvwxyz

The primary typeface for CDC is Mont Bold, this should be used for titles and body copy along with any infographics or designs that may be produced.

Substitute

Where Mont cannot be accesses it is allowed for ‘Quicksand’ to be used as a substitute font.

Example

This is a title

Graphics & Imagery

What are they?

The CDC brand utilises certain graphic elements to lift artwork and add variation and colour.

Taking the central negative space from the logo mark we are left with the CDC petal. This can be recoloured, stacked and layed out to create interesting graphical elements on artwork.

It can also be used to create image crops on spreads or websites.

When to use

We encourage the use of graphical elements to be used where appropriate. They should support messaging rather than over take it and be used in a tasteful manner. Do not 'over-do it' by having too many petals with too many colours at once.

Imagery

We hope to build a substantial bank of imagery for CDC over time. When using stock imagery try to source non-american or posed photos. They should remain bright and natural.
